for national security reasons or approve the license in question if there is no foreign policy reason to deny the license, unless the President exercises a National Security Override (see § 768.7 of this part). The effect of any such determination on the effectiveness of foreign policy controls may be considered independent of this part.

- (b) *Types of assessments.* There are two types of foreign availability assessments:
 - (1) Denied license assessment; and
 - (2) Decontrol assessment.
- (c) Expedited licensing procedures. See §768.8 of this part for the evaluation of eligibility of an item for the expedited licensing procedures.

[61 FR 12915, Mar. 25, 1996, as amended at 61 FR 68585, Dec. 30, 1996]

§ 768.4 Initiation of an assessment.

- (a) Assessment request. To initiate an assessment, each claimant or TAC must submit a FAS or a TAC Certification to BXA. TACs are authorized to certify foreign availability only to controlled countries. Claimants can allege foreign availability for either controlled or non-controlled countries.
- (b) Denied license assessment. A claimant whose license application BXA has denied, or for which it has issued a letter of intent to deny on national security grounds, may request that BXA initiate a denied license assessment by submitting a Foreign Availability Submission (FAS) within 90 days after denial of the license. As part of its submission, the claimant must request that the specified license application be approved on the grounds of foreign availability. The evidence must relate to the particular export as described on the license application and to the alleged comparable item. If foreign availability is found, the Secretary will approve the license for the specific items, countries, and quantities listed on the application. The denied license assessment procedure, however, is not intended to result in the removal of the U.S. export control on an item by incrementally providing a country with amounts that, taken together, would constitute a sufficient quantity of an item. The Secretary will not approve on foreign availability grounds a denied license if the approval of such li-

cense would itself render the U.S. export control ineffective in achieving its purpose. In the case of a positive determination, the Secretary will determine whether a decontrol assessment is warranted. If so, then BXA will initiate a decontrol assessment.

- (c) *Decontrol assessment.* (1) Any claimant may at any time request that BXA initiate a decontrol assessment by a FAS to BXA alleging foreign availability to any country or countries.
- (2) A TAC may request that BXA initiate a decontrol assessment at any time by submitting a TAC Certification to BXA that there is foreign availability to a controlled country for items that fall within the area of the TAC's technical expertise.
- (3) The Secretary, on his/her own initiative, may initiate a decontrol assessment.
- (d) *BXA mailing address.* All foreign availability submissions and TAC certifications should be submitted to: Department of Commerce, Bureau of Export Administration, 14th Street and Pennsylvania Avenue, NW, Room 3877, Washington, DC 20230.

§ 768.5 Contents of foreign availability submissions and Technical Advisory Committee certifications.

- (a) All foreign availability submissions must contain, in addition to information on product or technology alleged to be available from foreign sources, at least:
 - (1) The name of the claimant;
- (2) The claimant's mailing and business address;
- (3) The claimant's telephone number; and
- (4) A contact point and telephone number.
- (b) Foreign availability submissions and TAC certifications should contain as much evidence as is available to support the claim, including, but not limited to:
- (1) Product names and model designations of the items alleged to be comparable;
- (2) Extent to which the alleged comparable item is based on U.S. technology;
- (3) Names and locations of the non-U.S. sources and the basis for claiming

§ 768.6

that the item is a non-U.S. source item;

- (4) Key performance elements, attributes, and characteristics of the items on which a qualitative comparison may be made;
- (5) Non-U.S. source's production quantities and/or sales of the alleged comparable items and marketing efforts:
- (6) Estimated market demand and the economic impact of the control;
- (7) Product names, model designations, and value of U.S. controlled parts and components incorporated in the items alleged to be comparable; and
- (8) The basis for the claim that the item is available-in-fact to the country or countries for which foreign availability is alleged.
- (c) Supporting evidence of foreign availability may include, but is not limited to, the following:
- (1) Foreign manufacturers' catalogs, brochures, operation or maintenance manuals:
- (2) Articles from reputable trade and technical publications;
 - (3) Photographs;
- (4) Depositions based on eyewitness accounts; and
 - (5) Other credible evidence.

NOTE TO PARAGRAPH (c) OF THIS SECTION: See Supplement No. 1 to part 768 for additional examples of supporting evidence.

- (d) Upon receipt of a FAS or TAC certification, BXA will review it to determine whether there is sufficient evidence to support the belief that foreign availability may exist. If BXA determines the FAS or TAC certification is lacking in supporting evidence, BXA will seek additional evidence from appropriate sources, including the claimant or TAC. BXA will initiate the assessment when it determines that it has sufficient evidence that foreign availability may exist. Claimant and TAC certified assessments will be deemed to be initiated as of the date of such determination.
- (e) Claimants and TACs are advised to review the foreign availability assessment criteria described in §768.6 of this part and the examples of evidence described in Supplement No. 1 to part 768 when assembling supporting evi-

dence for inclusion in the FAS or TAC certification.

§ 768.6 Criteria.

BXA will evaluate the evidence contained in a FAS or TAC certification and all other evidence gathered in the assessment process in accordance with certain criteria that must be met before BXA can recommend a positive determination to the Secretary. The criteria are defined in §768.1(d) of this part. In order to initiate an assessment, each FAS and TAC certification should address each of these criteria. The criteria are statutorily prescribed and are:

- (a) Available-in-fact;
- (b) Non-U.S. source;
- (c) Sufficient quantity; and
- (d) Comparable quality.

§ 768.7 Procedures.

- (a) *Initiation of an assessment.* (1) Once BXA accepts a FAS or TAC certification of foreign availability, BXA will notify the claimant or TAC that it is initiating the assessment.
- (2) BXA will publish a FEDERAL REGISTER notice of the initiation of any assessment.
- (3) BXA will notify the Departments of Defense and State, the intelligence community, and any other departments, agencies and their contractors that may have information concerning the item on which BXA has initiated an assessment. Each such department, agency, and contractor shall provide BXA all relevant information concerning the item. BXA will invite interested departments and agencies to participate in the assessment process (See paragraph (e) of this section).
- (b) Data gathering. BXA will seek and consider all available information that bears upon the presence or absence of foreign availability, including but not limited to that evidence described in §768.5 (b) and (c) of this part. As soon as BXA initiates the assessment, it will seek evidence relevant to the assessment, including an analysis of the military needs of a selected country or countries, technical analysis, and intelligence information from the Departments of Defense and State, and other U.S. agencies. Evidence is particularly sought from: industry sources
